The Library of Congress proposal was to change the ALA/LC romanization table to be based entirely on the ISO 843 1997 (1999 rev.) with the following exception: retain the romanization of Φ, φ as Ph, ph in Classical Greek. Although not specifically stated in the proposal, the convention of romanizing for rough breathing whether or not the mark appears in the Greek vernacular will no longer be used. The "h" would only be added if the rough breathing mark were present.
